MEETING HALL

Got to the meeting.

TEAMWORK in Breakout Rooms

Discuss about the decision to be taken on the island. **(What and why?)**

Prepare a **pitch** with your team members **(of max. 60 sec.)**

TEAMWORK in Breakout Rooms

Discuss about the decision to be taken on the island. **(What and why?)**

Prepare a **pitch** with your team members **(of max. 60 sec.)**

→ Use 1 slide with your **names, key thoughts** and **final conclusion**

BREAKOUT TIME

TEAMWORK in Breakout Rooms

15 min 

Discuss about the decision to be taken on the island. **(What and why?)**

Prepare a **pitch** with your team members **(of max. 60 sec.)**

→ Use 1 slide with your **names, key thoughts** and **final conclusion**

ROOM NUMBER is SLIDE NUMBER

PITCH TIME

60 seconds

Give your **COMMENTS** on
the **itches**.

2. Apply to the case

In the [next page](#) you can take part in a forum and apply the pillars of sustainability to the case of the holiday resort.

REPLY to at least 2 topics and share your view on how the pillar(s) connect to the case of the holiday resort.

1. Human sustainability

How does the case of the holiday resort, according to you, connect to Human sustainability? Share your view.
Human sustainability aims to maintain and improve the human capital in society. Investments in the health and education systems, access to services, nutrition, knowledge and skills are all programs under the umbrella of human sustainability. Natural resources and spaces available are limited and there is a need to balance continual growth with improvements to health and achieving economic well-being for everyone.

2. Social sustainability

How does the case of the holiday resort, according to you, connect to Social sustainability? Share your view.
Social sustainability aims to preserve social capital by investing and creating services that constitute the framework of our society. The concept accommodates a larger view of the world in relation to communities, cultures and globalisation. It means to preserve future generations and to acknowledge that what we do can have an impact on others and on the world. Social sustainability focuses on maintaining and improving social quality with concepts such as cohesion, reciprocity and honesty and the importance of relationships amongst people.

3. Economic sustainability

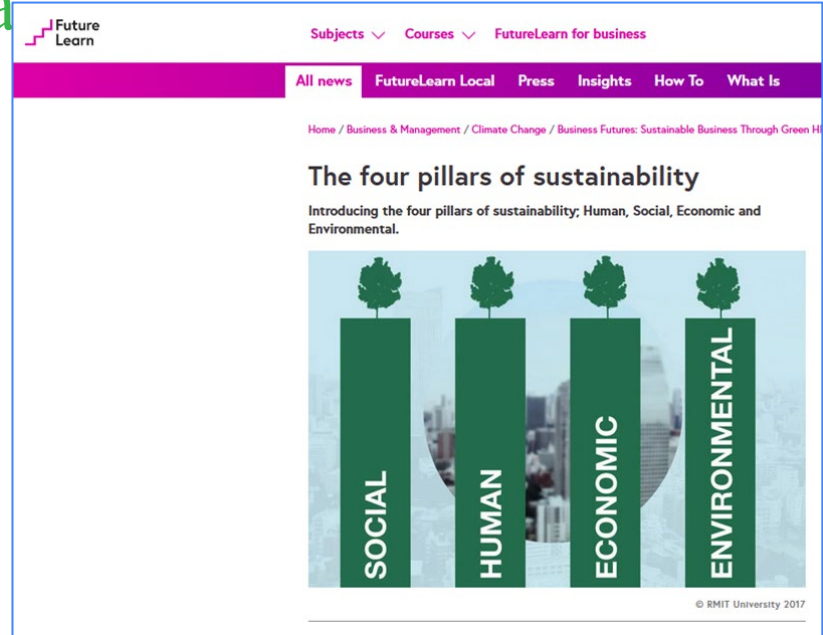

How does the case of the holiday resort, according to you, connect to Economic sustainability? Share your view.
Economic sustainability aims to maintain the capital intact. If social sustainability focuses on improving social equality, economic sustainability aims to improve the standard of living. Maintaining high and stable levels of economic growth is one of the key objectives of sustainable development. Abandoning economic growth is not an option. But sustainable development is more than just economic growth. The quality of growth matters as well as the quantity.

4. Environmental sustainability

How does the case of the holiday resort, according to you, connect to Environmental sustainability? Share your view.

Environmental sustainability aims to improve human welfare through the protection of natural capital (e.g. land, air, water, minerals etc.). Initiatives and programs are defined environmentally sustainable when they ensure that the needs of the population are met without the risk of compromising the needs of future generations.

Climate Crisis Resilience

Climate Crisis Resilience: Content, Competencies & Approaches for Secondary School Teachers

This LTP focuses on teaching about the climate crisis and developing resilience through educational games. It centres on providing better understanding of the climate crisis and resilience on a personal and collective level. In the first unit, an introduction is given on how gamification can enhance teaching and learning about the climate crisis and about becoming resilient. Digital game-style elements are incorporated in the second unit in which an online platform is used to teach disaster risks and resilience. The third unit is designed as a team challenge with different competition levels; it is framed around an ecological controversy. Unit 4 is dedicated to the creation of a board game about climate crisis resilience and the pedagogical possibilities this offers.

Methodology

The LTP is focused on hands-on and digital educational resources for the development of primary school students' sustainability competences.

Unit 2. Stop Disasters! Using The UNDRR Game as a Learning Tool for Disaster Risk Reduction & Resilience

Unit 2 introduces digital games as a way to teach sustainability. It focuses on the Stop Disasters! flood scenario, which takes place in a fictitious small village of a few hundred people in Eastern/Central Europe. The village is built on a large river which will flood after 20 minutes of game-play (in the Easy scenario) or when manually triggered by the player. The basic idea is that the player – or players working in teams – ‘invest’ a given sum of money in preparing the village for the expected flood. By repeating the scenario a number of times the player or team can learn to improve the outcomes for the village.

TEACHING SUSTAINABILITY

A reminder from K&R Education The Evaluation Team

Marie Kniest, Mats Westerberg, Annika Rickard

2024

A Reminder - Evaluation points for the Online 3

1. Survey of the entire course at the final session, today - September 24 at 18.00 - 18:30 PM CEST.
2. Respond to a **questionnaire** about competence development (GreenComp), which will be sent out, today - September 24 at 18.00 - 18:30 PM CEST.
3. We invite **ALL** of You to participate in a **focus group** on October 2 at 12:00-13:00 PM CEST.

QUESTIONS?
