Teacher Academy Project
TEACHING SUSTAINABILITY

Co-funded by the European Union

Start-Up Activity 2

Note: the ideas are based on the discussion during one of the TAP-TS Events

Please discuss with your group and add ideas to this table:

	Education for unsustainable futures	**Education for Sustainable Futures**
Values	individual success, competition, nationalism, economic profit, short term-ism	solidarity, understanding our interdependencies, caring for each other and the planet, inclusivity
Beliefs	Always one correct answer School knowledge better Teachers are always right Conservative thinking promote unsustainable education Western knowledge, thinkers more important	Rights for the planet Respect others Being open to different or opposite opinions. To think out of the box Small actions can also help. To make it equal for everyone even if the place of birth is different Learners bring knowledge and skills Respect different ways of thinking and skills Teamwork and learning between different subjects e.g., STEAM Scientific knowledge and processes accessible for everyone.
Actions	punishments Teacher was just in front of the class Authority by teaching.	Doing things in the real world - make a difference Learn practical things Protests, Bonus programms

	Only colonial Theories in the classroom. Ranking learners - who is best, who is worst?	Solve problems, be creative in the classroom. Social forms Teamwork with people from other countries.TT Be active and critical toward problems. Citizen science
Places	It happens in the classroom and can also happen at home with the family Media and businesses shape our thinking - and wants	Kindergarten and primary school Outside - in nature - Other places like in the nature, at home. Virtual - so we can meet people from other places.
People	Old white man, chairman, CEO´s, companies. Sport - Trainers. Experts with academic knowledge	Grandparents, social workers, teachers, positive Influencers Involve parents in change - or they block it!! Not just job of school! Local environmental groups. Diverse people.. Experts - with different kinds of knowledge (also non academic)
Other (e.g. emotions, relationships)	Fear, stress, worry, rigidity,	Creativity, equality, diversity, new technology, Lifelong learning - not just for children
