BINGO

I use reusable drinking bottles, coffee cups and shopping bags instead of disposable plastic products.	I mainly use public transport, bicycles or car sharing instead of driving my own car.	I buy products with environmentally friendly certifications such as Fair Trade, organic or MSC (Marine Stewardship Council) and often buy locally produced products to minimise transport distances.	I know the principle of unpackaged shops.
I make sure that I waste very little food.	I know what TENCEL means.	Sustainability is very important for me and I practice it also in my everyday life.	I have an idea on how to save our planet.
I love networking and exchanging ideas with other people.	I have a role model who inspires me in my work.	I know a method(s) how to motivate students in the class.	My vision of the future is positive.
If I would have a lot of money, I would start a business.	I made a compliment for my colleague last week.	I wish I had more free time.	One day I will save the world.
